

DETAILS ON VOLTAGE SUPPLY FOR THE AZO-SYSTEM:  protection class : IP54 operation voltage :230 Volt control voltage :24 V,50 Hz max. connected load :4,2 kW running at the same time :4,2 kW	COMPRESSED AIR SUPPLY: Necessary air pressure: min. 5 bar max. 6 bar over pressure. Necessary air amount: 0,2 Nm³/Min.  If the connection line to the valve is not larger than 2 m, the diameter for the tube could be like the connection diameter of the valve. At a longer connection line the diameter of the line should be designed bigger in accordance to the sub – supply line.  Purity classes standardized in ISO 8573-1: 2001				DEPICTION REFERENCE:  — AZO supply  — provided by customer  — Option  ○ items see in offer		NAME DATE PROTECTION MARK ISO 16016		<b>AZO.</b>
